

23. Develop a python program that evaluates the coherence of a given text.

Code

```
text = input("Enter text: ")
sentences = text.split(".")
if len(sentences) > 1:
    print("The text appears coherent.")
else:
    print("The text has low coherence.")
```

Input

The sun rises in the east. Birds fly in the sky.

Output

The text appears coherent.
