

9. Implement a rule-based part-of-speech tagging system using regular expressions using python.

Code

```
import re

sentence = input("Enter a sentence: ")

words = sentence.split()

for word in words:

    if re.match(r'.*ing$', word):

        tag = "VBG"

    elif re.match(r'.*ed$', word):

        tag = "VBD"

    elif re.match(r'.*ly$', word):

        tag = "RB"

    else:

        tag = "NN"

    print(word, "->", tag)
```

Sample Input

running quickly played

Sample Output

running -> VBG

quickly -> RB

played -> VBD
